

EVERY GENTLEMAN GOES HEELED IN THE DOMINICAN REPUBLIC

(By Associated Press.)
SANTO DOMINGO CITY, Mar. 7.—Almost three months has not been sufficient time for the United States Marines, comprising the forces of the temporary military occupation, to gather in all the arms of the republic as provided in one of the first orders issued by Captain H. S. Knapp, U. S. navy, acting head of the temporary government, which called for the volunteer surrender of all arms, ammunition and explosives, and the search is still in progress.

Persons familiar with the Dominican desire to possess arms express the belief that it will be next to impossible ever to bring about a state of complete disarmament here. "It has been most common to see gentlemen in balls, or other entertainments, armed not only with a revolver, but a knife and dagger," according to a man who has resided here for more than thirty years. "A revolver was as much a part of a gentleman's attire as his shoes or his shirt. Everybody was armed."

All firearms are strictly forbidden in Santo Domingo by the Dominican laws, except as imported by the government for government use. But there has never been much difficulty in obtaining either arms or ammunition and many persons have grown rich dealing in this class of contraband. Smuggling direct from the United States or from Haiti or Porto Rico has been carried on for years, despite the law, it is said, and a good revolver was considered worth almost its weight in gold United States money. Revolvers costing \$12 or \$14 in the United States could be had here only at prices ranging from \$25 to \$50. Ammunition, though prohibited, could be purchased at like increase in price.

Most of the firearms so far gathered in by the marines have been of ancient vintage, many of them so old and of designs that military officers say they never before saw anything like them. Quantities of ammunition have been found which have not been manufactured since the time of the civil war.

AMERICAN SHIPS ARE LYING IDLE OWING TO THE SUBMARINE SCARE

(By Associated Press.)

NEW YORK, Mar. 7.—As a direct result of the German blockade decree of January 31 which also closed to neutral shipping the British ports of Kirkwall and Falmouth, 500 steamers of American, Swedish, Danish, Dutch and Norwegian registry have been prevented from sailing from the port of New York, or having sailed, now are tied up for an indefinite time at Halifax for examination.

According to figures compiled here today by shipping authorities, these ships, had they sailed as scheduled, would have taken from this port approximately 296,000 tons of cargo. Fourteen of the vessels would have carried passengers and United States mails.

The heaviest sufferer has been Holland. Agents here of steamers flying the Dutch flag reported today that 25 vessels that would have sailed under conditions prior to February 1 are tied up at their piers or have detained at Halifax for examination.

action. Ten freight ships of neutral nations, classed as tramps, also are held here awaiting orders.

The American line, which now has its entire fleet of six passenger ships in port, has missed eight sailing dates and all passenger traffic to Europe other than that carried by vessels of the entente allies and Spain, has been suspended. The same conditions prevailed for west-bound traffic.

The number of ships of the entente allies departing from New York during the period from February 1 to March 5 is shown by port records to be 20 ships less than sailed between December 29 and January 21. The sailings were as follows:

Nationality	Dec. 29-Jan. 21	Feb. 1-Mar. 5
British	110	100
French	18	11
Japanese	3	4
Italian	9	5
Total	140	120

ore producers on both sides of the valley and give a decided impetus to ore shipments from the north end of the county.

The minimum daily production at the mine is now 40 tons daily. Under the new arrangements it is expected to increase this.

In this connection, the Revelle has often urged the Nevada Central to extend its line several miles south from Leslie, making a shipping terminus nearer to well-established mines up Reese river, which are now inoperative because of the high cost of hauling to the railroad by wagon.—Austin Revelle.

AMERICAN SUSPECTED OF BEING IN A PLOT

TEACHER OF ENGLISH IN TOKIO COLLEGE HELD FOR INVESTIGATION

(By Associated Press.)

TOKIO, Mar. 7.—The case of Ralph Hoyt Thayer is attracting considerable attention in Japan. He has been imprisoned in the Yokohama jail daily undergoing secret examination at the hands of a preliminary magistrate.

The judicial authorities refuse to make any statement concerning the affair, except to say that "Thayer was arrested at Yokohama three nights after the explosion of the battleship cruiser Tsushima at that port and he was at once taken into custody for entering a fortified zone without authority. Thayer was a

teacher of English in St. Paul's Episcopal College at Tokio, an institution conducted by the American Episcopal mission.

The Episcopal mission appointed a committee to look after the interests of Thayer. His friends express the opinion that he was interested in the education and conversion of Japanese sailors and that he visited Yokosuka merely to inquire if any of his acquaintances had been killed in the explosion.

Naval officers have been quoted as saying that Thayer was not arrested in connection with the Tsushima explosion as alleged by Japanese newspapers.

R. Schofield and C. Dresser, of Kobe, employees there of the American Trading company, who were arrested for possessing wireless telegraph instruments, have been released. The authorities found they were merely engaged in innocent experiments.

FRENCH HOLD TRENCHES RECAPTURED YESTERDAY

(By Associated Press.)

PARIS, Mar. 7.—Fighting in the region of Carriers Wood at Beaumont, northeast of Verdun, is continuing. The Germans attempted to drive the French from the trenches which the latter recaptured yesterday. The effort failed.

BRITISH ATTACK REPULSED BY GERMAN FORCES

(By Associated Press.)

BERLIN, Mar. 7.—The British attacked the German lines east of Bouchemmes, and north of Peronne after a violent artillery fire,

and were repulsed, while other British attempts were frustrated by German fire.

The plumber says: "Let north winds do their worst; I can not grieve as long as boilers burst."—Chicago Post.

BOYS STOCK RANCH FOR HALF MILLION

MOST OF PURCHASE MONEY MADE FROM RANCHING IN ELKO

A deal was closed yesterday whereby the firm of Hylton & Clayton Bros. take over the Morgan Hill ranch in Elko county, consisting of about 23,000 acres, 2100 head of cattle and 100 head of horses, the consideration being between \$400,000 and \$500,000, says the Elko Free Press.

This ranch is located on the north fork of the Humboldt river, and extends practically from its source to the North Fork mountains to its mouth near Elburz, with the exception of a number of miles from the Devils Gate canyon to the canyon just above the Keddies ranch near the old Gilruth place. This ranch is one of the largest ranches of the county, and was formerly known as the Murphy ranch. All the land goes in on the deal with the exception of about 2300 acres, known as the Haystack ranch, which adjoins the lower part of the Rancho Grande ranch on the upper part of the river. This firm, composed of J. J. Hylton, and the four Clayton brothers, Arthur, Archie, Al and Charles, was formed three years ago, at which time they bought the Homestead ranch on the south fork, consisting of 2000 acres; they leased a portion of the Morgan Hill ranch, that portion known as the Rancho Grande, and have purchased several thousand head of stock, until they became one of the large stock companies of the county. Since that time they have bought several thousand acres on the north fork, adjacent to the ranch they have just taken over, and each member of the firm has come to be recognized as among the leading and substantial stockmen of the state.

The senior member of the firm, John J. Hylton, is probably one of the wealthiest and largest individual land owners in the state. He is a man of about 60 years of age, and every dollar he owns he has made by his own efforts. Coming to Elko county in early days, he at first worked out as a hired man.

NEW YORK INCOME TAX IS DOUBLED

DOWNTOWN DISTRICT WILL PAY \$66,000,000, COLLECTOR LOW ESTIMATES

Revenue on income tax collections in the second district of New York for the fiscal year ending June 30, 1917, will be more than double that of last year and almost five times as great as that of 1914, according to an estimate given out by John Z. Lowe, Jr. United States

PARK CITY MINES INCREASE WAGES

BIG PROPERTIES OF UTAH CAMP ADVANCE PAY OF ITS EMPLOYEES

Recognizing the fact that the present prices of food products are far in advance of the quotations that prevailed even so short a time as one year ago, and also recognizing the fact that the upward trend of the metal market has brought to the mine operators a degree of prosperity not heretofore enjoyed, the leading mine operators of Park City, have voluntarily raised the wages of their employees 25 cents per day, the notice of the advance, which dates from March 1 being posted in the various offices of the big mines yesterday.

The scale formerly paid was \$3.50 per day for muckers, \$3.75 for machine men, \$4 for timber men, \$4.50 for engineers.

Leaving out of consideration the lessees, there are approximately 1000 men employed in the mine and mills of the great camp, the principal active properties being the Silver King Coalition, the Daly Judge, the Daly West, the Ontario, the Silver King Consolidated, the Nalidriver, the New Quincy and the California Comstock.—Salt Lake Tribune.

COPPER CANYON ORE GOES OUT BY DILLON

The Nevada Central railroad will come in for a 14-mile haul but of the ore that is coming from operations at Copper Canyon and nearby properties as soon as plans agreed on are put into effect.

The mining company will expend the sum of \$2000 in repairing the road, or building a road, from the mine to Dillon station on the railroad, which is 14 miles from Battle Mountain and nine miles from the mine. Big caterpillar tractors will deliver the ore to the shipping point.

It is expected that this lead will be followed by other prospective
